Who We Are

We are a team of Project Management and QA/QC Professionals based in China, Hong Kong, Macau and Taiwan. We offer Expatriate Managers with highly qualified local support teams to oversee your manufacturing, fabrication, procurement and supply chain management. As part of our service, we provide sourcing of multi type of Steelwork for various industry including Construction, Oil & Gas, Mining and Marine. Our highly experience team in Steelwork Fabrication and good partnership with various local fabricators is our key of success in delivering high quality products into various International quality standards within tight construction programs.

At PMI International, we are flexible. We bring management solutions designed to meet your specific needs. We'll match the right training and the best project management consultants to the task at hand.

PMI International

Overview

PMI International is an established China strategic procurement business providing:

- ⇒ **Fabricated Steelworks;**
 - ⇒ **Modular and Pre-Assembled Units;**
 - ⇒ **Associated Bulk Construction Material;**
 - ⇒ **Shop drawing design and detailing.**
- ◆ Our business is based on sourcing and services by providing competitive and low risk procurement by adding value and providing certainty to our Client.
 - ◆ In turn, this enables our Client to successfully win and deliver projects on-time and up to the required Quality Standard.

OUR EXPERIENCE & SPECIALITY

- ◆ Project Management Teams by experienced Expats and Locals working in multiple International Projects;
- ◆ Our Quality Control and Assurance Teams were built up from highly qualified personnel from both International and Local Organization.
- ◆ Good partnership with local fabricators and Freight Forwarders.

PMI delivers on its promises through:

- ◆ Highly Experienced Management Teams;
- ◆ Deep knowledge and understanding in the China Market;
- ◆ Industry and Subcontractor Partnerships;
- ◆ Thorough understanding of international quality requirements and expectations.

Our Ability

- ◆ Huge and various fabrication capacity;
- ◆ Competitive market rates;
- ◆ Knowledge in China's fabrication market;
- ◆ Large variation in capability & process;
- ◆ Range of modular yards available;
- ◆ Multiple fabrication yards and partnership;
- ◆ Great potential, great value, and cost saving to our Client.

Fabricated Steelworks

Our special teams consist of steelwork experts in design, fabrication, assembly, modularization, and QA/QC. It is the precious asset to deliver a job within the tight construction program and quality demand where the trust that has been developed by us in having a good relationship and communication with local factories is the key of our success. Our good relationship and partnership with more than 15 steel fabricators in various range of capability and specialty across the country are divided into few specific category:

- ◆ **Bridge Structures**
- ◆ **Building Structures**
- ◆ **Marine Structures**
- ◆ **Temporary Steelwork**

Modular & Pre-assembled Units

Modular and pre-assembled units are another demanding request by the industry. The strategy and part of the benefit of this method is to reduce effort, risk and cost at the project site. This also gives an added advantage on schedule monitoring, reduces the need of specialized equipment, site environmental risk, labor, and lessens the interference with Client's site operations. These can only be achieved by having an experienced and skillful team to manage and oversee the overall process from design, fabrication, quality control, until the loading activity onto vessel.

In PMI, part of our specialty is to provide this fabrication method where our team consists of Managers, Engineers, Inspectors, Technical Specialists and Logistic with rich of experiences from the field and highly capable in delivering the best result to our customer. This has been proven by our previous track records in delivering remarkable worldwide projects within the required time frame together with the quality requirement.

Associated Bulk Construction Materials

We offer products such as:

- ◆ LSAW / Spiral Structural Steel Pile for Building Construction or Marine Works
- ◆ API 5L Steel Pile
- ◆ Customized / Standard Sheet Pile
- ◆ Pile Cage for Jetty Construction
- ◆ Other related construction bulk material

We also provide our customer Associated Bulk Construction Materials specifically related to steelworks. This method is best known as cost saving, re-claim more man-hour, job consistency, and benefit to the construction schedule.

As the demand on this is very high in the market, with the various range of quality standard across the globe and dealing with tight construction program, we at PMI are well aware of these requirement. Most cases we encountered

throughout our experienced is where the purchaser overlooking this matter and expecting the product to be meeting the requirement. Our strong Management team, Engineers, Inspectors, and experienced technical experts are dedicated to deliver our customer's needs.
